## Book Descriptions:

# Browning blr 81 manual

A list of modern browsers is below; simply click an icon to go to the browser's download page. Would you like to visit Browning International If you cannot find the manual you need please use our online order system or contact us directly at any time by email or by phone during office hours. It is important that you read and understand your firearms owners manual thoroughly before using it. They range in size from 1mb to 10mb. These files require Adobe Acrobat Reader 6 or above. If you do not have this program installed on your computer, you will not be able to view these files. If you need Adobe Acrobat Reader you can get this free program from Adobe. Try our online manual order form. If this does not seem to work, we recommend you click the links below with your right mouse button, then select Save Target As from the menu or similar wording, depending on your browser. How seriously you take these responsibilities can be the difference between life and death. There is no excuse for careless or abusive handling of any firearm. At all times handle this firearm and all other firearms with intense respect for their power and potential danger. Please read and understand all of the cautions, warnings, notices, proper handling procedures and instructions outlined in this owner's manual before using your new firearm. Be extremely alert and aware of all persons and property within the range of your ammunition. Mechanical "safeties" are designed to place your firearm in a safer status, and no guarantee can be made that the firearm will not fire even if the "safety" is in the on safe position. Mechanical "safeties" merely aid safe gun handling and are no excuse for pointing your firearm's muzzle in an unsafe direction. Always treat this firearm with the respect due a loaded, readytofire firearm. Remember, merely removing the magazine does not mean the chamber is unloaded. Always keep the chamber empty and the "safety" in the on safe position unless shooting is imminent. © Browning used by permission

Wear hearing protection shooting earplugs or muffs to guard against such damage. Allow proper distance eye relief between a scope and your eye when firing a scoped rifle, shotgun or pistol. Do not use unorthodox shooting methods that could cause the rearward travel of the slide or bolt of a firearm to contact your eyes, face or hands. Always keep a safe distance between the muzzle of your firearm and any persons nearby, as muzzle blast, debris and ejecting shells could inflict serious injury. Be extremely careful while hunting or during any shooting activity to avoid dropping any firearm. The following rules should always be observed by you and those you hunt with. Always make certain that the stand being used is safe and stable. Always make certain that your firearm is unloaded when it is being taken up and down from the stand. Always make certain that your firearm is not dropped from the stand, or dropped while it is being taken up or down from the stand. Store all firearms in secure, locked cases or a gun safe. Keep your firearm unloaded when not in use. It only takes a small obstruction to cause dangerously increased pressures that can damage your firearm and cause serious injury to yourself and others. Rotate the ejection area of the firearm away from you, carefully open the action and remove the shell from the chamber. If the primer is indented, the defective shell should be disposed of in a way that cannot cause harm. If the primer is not indented, your firearm should be examined by a qualified gunsmith and the cause of the malfunction corrected before further use. Glance down the barrel to make sure that no obstructions remain in the barrel. Completely clear the barrel before loading and firing again. Failure to follow these instructions can cause extensive damage to your firearm and possible serious injury to yourself and others. Store all shells of different gauges in completely separate and wellmarked containers. <http://daysinneunice.com/images/danby-ddr401-dehumidifier-owner-s-manual.xml>

Never store shells of mixed gauges in a common container or in your pockets. It is your responsibility to read and heed all warnings in this owner's manual and on ammunition boxes. Nevertheless, we can assume no liability for incidents which occur through the use of shells of nonstandard dimensions or which develop pressures in excess of commercially available ammunition which has been loaded in accordance with standards established by the Sporting Arms and Ammunition Manufacturers' Institute SAAMI. Never shoot at water or hard objects. If you observe other shooters violating any of these safety precautions, politely suggest safer handling practices. Keep ammunition away from the cleaning location. Never test the mechanical function of any firearm with live ammunition. Encourage enrollment in hunting and shooting safety courses. We assume no liability for incidents which occur when unsafe or improper firearm accessories or ammunition combinations are used. Browning firearms should be serviced by a Browning Recommended Service Center or by our Service Facility in Arnold, Missouri. We assume no responsibility for injuries suffered or caused by unauthorized servicing, alterations or modifications of Browning firearms. Browning firearms are designed and engineered to meet stringent safety standards. Browning is not responsible for personal injuries or property damage caused by alterations to a firearm. This includes the incorporation of aftermarket parts or components that may or may not satisfy Sporting Arms and Ammunition Manufacturers' Institute SAAMI standards for example, an aftermarket trigger system may not satisfy SAAMI minimum trigger pull standards, etc. or may create other dangerous conditions. These conditions may or may not be apparent to the user for example, installing an aftermarket barrel may have the effect of altering critical firearm dimensions, including headspace, and may create an unsafe firing condition, etc..

Aftermarket parts or components that do not satisfy SAAMI standards, or that could create other dangerous conditions, should not be used. Visit the Web site of the California Attorney General at for information on firearm laws applicable to you and how you can comply. If you keep a loaded firearm where a child obtains and improperly uses it, you may be fined or sent to prison. Visite la pagina web de California Attorney General, para mas informacion sobre como cumplir con las leyes de armas de fuego. Si usted deja un arma cargada al alcance de un nino, y este la utiliza indebidamente, usted podria ser multado e incluso enviado a la carcel. Reload to refresh your session. The Lightning BLR and Lightweight 81 BLR utilize the most modern design of any lever action rifle, with an advanced rackandpinion lever system and strong rotary bolt locking design. The proper caliber for your rifle is inscribed on the right side of the barrel. You can safely shoot ballistically superior pointed bullets, since the Lightning BLR and Lightweight 81 BLR have a box magazine and not a tubular one. Always keep a safe distance between the muzzle of your firearm and any persons nearby, as muzzle blast, debris and ejecting shells could inflict serious injury. Also, wear eye protection when disassembling of 30 seconds.

<https://lakecountyoralsurgery.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626706afc12ac---canon-af35ml-manual.pdf>

Browning firearms should be serviced by a Browning Recommended Service Center or by Brownings service facility in Arnold, Missouri. Use a light gun oil such as Browning Oil. Return the lever to the closed position, reinsert the magazine and return the hammer to the half cock, folded down position. The correct caliber is inscribed on the right side of the barrel. 4 With the bolt closed and the hammer in the foldeddown hammer position, reinsert the loaded magazine into the rifle. It is important to use the correct ammunition for your particular rifle. You should check the right side of

your barrel for the caliber of your model. Note The Lightning BLR and Lightweight 81 BLR incorporate a trigger mechanism which will not allow the trigger to be pulled until the lever is fully closed. This is a specialized, finely fitted mechanism. You may permanently mar it by attempting to disassemble the inner mechanism assemblies. Hold this position for a minimum of 30 seconds. Carefully open the action and remove the cartridge. Your rifle is a mechanical device which will not last forever, and as such, is subject to wear and requires periodic inspection, adjustment and service. Removal of metal from barrels, or modification of Browning firearms. 22. Browning assumes no liability for injuries suffered or caused by Browning s service facility in this instruction book, on ammunition boxes and with all accessories that you install on your Browning gun. Your rifle is subject to date.The following terms are frequently used to search for Browning BLR supportWhat does the C mean. Because of this, the BLR can be chambered for rounds with pointed tip bullets that would be inappropriate for the tubular magazines more commonly used in leveraction rifles. Another difference is the geared lever and bolt design that can accommodate highpressure modern magnum rounds. Another notable feature is that the trigger moves with the lever when it is operated, which prevents the shooters trigger finger from being pinched between the lever and the stock when the lever is closed.Although this made the rifle lighter, many owners prefer the steel receiver version.Please help improve this article by adding citations to reliable sources.
