Dip your coffee measure into your coffee, which likely holds 2 tablespoons 30 ml of coffee. Level the scoop of coffee out and then dump this measurement into the coffee filter. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. This is super important for getting a great cup of coffee. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Insert the filter holder into the machine, twisting the handle until it's firmly locked into place. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. This is the symbol to the right of the squiggly line, showing a cup of coffee and a spout. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Once you've created coffee by filling the filter with coffee grounds and brewing a cup, fill a frothing pitcher with about 3.5 ounces 99 g of milk. Put the pitcher under the frother and rotate the knob to the steam option. Rotate the steam knob counterclockwise to begin frothing your milk. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Place a cup under the spout and turn the knob to the squiggly line to preheat it. Once the green light comes on, switch the knob to the coffee cup and spout icon. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Place your espresso machine on a stable surface away from water sources to keep it undamaged.

Make sure nothing will get tangled in the cords, and that the machine isn't able to fall by accident. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Open the lid of the machine and pull out the water tank. Fill it up without going past the maximum water level, which is marked on the tank. Just make sure you don't overfill it. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Once you flip it, the lights on the machine will flash, meaning it's heating up. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. The steam button has an icon of a steam cloud on it. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Measure out 2 tablespoons 30 ml of the preground coffee and pour it into the filter. Press down on the coffee using the presser before attaching the filter holder to the machine by aligning it with the "Insert" label. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. Select the filter used for coffee pods, which has a symbol of a coffee pod on it, and place it in the filter holder. Put the pod in the filter and attach the filter holder to the machine by inserting it where there's an "Insert" label. This image is not licensed under the Creative Commons license applied to text content and some other images posted to the wikiHow website. After you've created a regular cup of coffee, fill a cup with 100 grams 3.5 oz of cold milk. Once the steam button is steadily lit, place the cup of milk under the milk frother.
