We'll let you know what we're up to, and you can tell us how we're doing. The SureStim feature gives the user a positive vibrating feedback in the transmitter to let the trainer know that correct stimulation was received by the receiver. The Dogtra 7000M is designed for smaller sized dogs or dogs which don't need a high level of correction. If you are looking for a SureStim unit for larger dogs the Dogtra SureStim 7100H is great for dogs over 20 lbs. Features Accessories such as, chargers, splitter cables, antennas, straps and batteries have a oneyear warranty from the date of purchase. Once the first and second year warranty coverage expires, the Limited Lifetime Warranty will cover for all parts except accessories and labor fees. Labor fees and shipping fees incurred are the customers responsibility. Labor fees will be variable depending on the extent of work required. If your product is not registered and proof of purchase is not available at the time of service, Dogtra will estimate the age

of the unit by the serial number. Serial number estimates can be different than the actual purchase time. Without proof of purchase or product registration this is the only method they have for determining the approximate date of purchase. Exactly what I ordered came exactly when you said it would. I was able to track the packages status on UPSs web site from the tracking number I received from your shipment. Tony S. Monona, WI I am happy to say this is the second time I have purchased from GundogsOnline and the second time I have been TOTALLY satisfied. Not only did my order come several days earlier than I expected but the. Steve View More. It does so by providing vibration through the handheld transmitter each time you administer a correction to your dog. This can very useful when wearing heavy gloves in cold weather. The SureStim collar is great for training small, sensitive, or easyto train dogs weighing over 15 pounds. Signals are reliably transmitted across a distance of up to half a mile and both the transmitter and receiver are 100% waterproofmaking it perfect for outdoor training in any environment. The Dogtra SureStim M Plus Series Trainer is expandable to a 2 dog unit additional receiver collar needed Be the first to review this product! Dogtra SureStim M is fully expandable to a twodog unit and feature a pager in the handheld transmitter, acknowledging that you have fully engaged the transmitter buttons. They have been discontinued by the manufacturer.They have been discontinued by the manufacturer.Have you purchased this product. Let us know what you think.Expand a twodog unit at any time with the SureStim Plus. I produced this DVD in 2005. All of these companies mistakenly feature avoidance training in their DVDs. In my opinion, this is a huge mistake. I have trained dogs for 45 years and have used remote collars for 25 years. There is a better way! Its unfair to the dog. You correct the dog before you even ask him to do something. Dog training needs to be BLACK and WHITE and this method of training is GREY. Dogs trained in avoidance training often dont understand where the stimulation comes from because the stimulation comes before the command. Absolutely! It is a very quick way to train a dog. This is why professional trainers use it. I guess if I trained dogs for people I would probably consider using it because it is so quick.

<http://dev.pb-adcon.de/node/16273>

I am thankful that I dont train other peoples dogs and I can take the time needed to work with my

own dogs. I teach the dog that the stimulation comes from ME. I want my dog to know that I AM THE ONE WHO CAN REACH OUT AND TOUCH HIM any time I wish. I use motivational methods for this training. The dog is motivated with food, praise or a toy during the learning phase. Dogs quickly learn that they MUST LISTEN TO YOU AND FOLLOW YOUR VOICE COMMANDS or there are consequences. It teaches how to determine the level of stimulation to use on a dog because every dog is different. It also covers problem solving and aggression issues in dogs. If you go to the web page on this DVD, you can read a detailed description of whats on the DVD. They have their head stuck in a hole for 25 years. They promote a method of training that was used 25 years ago. Dont fall into their trap. This way is a better way for your dog. Why dont you write one. Please check your inbox, and if you can't find it, check your spam folder to make sure it didnt end up there. Please also check your spam folder. The toggle switch allows for selection of either collar. Insert one end of the battery charging cable into the receptacle to charge the battery. See Battery Charging Procedure on page 21.. This positive feedback vibration feature is especially valuable when wearing gloves during cold weather training and hunting. Intended Use Dogtra ecollars are intended for behavior modification on dogs only. Page 4 PACKAGE CONTENTS PRODUCT SAFETY AND HEALTH STATEMENTS Proper Fit A proper fit is necessary for the Dogtra ecollar to work optimally. Both contact points must be in contact with your dogs skin at all times for a consistent stimulation. A loose fitting collar can cause the contact points to rub against the skin and cause irritation. Duration your dog can wear the unit Leaving the ecollar in the same position on a dog's neck for extended periods of time can also cause skin irritation.

Page 5 DESCRIPTION OF TRANSMITTER PARTS DESCRIPTION OF TRANSMITTER PARTS DESCRIPTION OF TRANSMITTER PARTS transmitter Transmitter Antenna A 2" antenna is supplied with the transmitter. The antenna must be fastened to the transmitter before using the unit. Page 6 DESCRIPTION OF TRANSMITTER PARTS DESCRIPTION OF TRANSMITTER PARTS Care for LCD Transmitters in Cold Temperature In cold temperatures 10 degrees F or below, the Liquid Crystal Display LCD on your transmitter may be dim or slow to respond. Wait until the display becomes visible before selecting any training level. LCD Screen The LCD screen indicates the stimulation level 0127. The LCD battery life indicator shows 3 bars at full charge, 2 bars at medium charge and 1 bar when it needs to be charged. Page 7 DESCRIPTION OF TRANSMITTER PARTS Transmitter LED Indicator Light The transmitter LED indicator light is located near the Rheostat Intensity Dial. It will flash every 4 seconds when the transmitter has been turned on. The color of the light indicates the status of the battery life. It flashes green when the battery is fully charged and turns to amber when the battery is at medium charge. It is acceptable to charge your unit even at medium charge without any damage incurred to your collar. There are two buttons and a toggle switch on the front of the transmitter, two buttons on the left side of the transmitter, and one button on the right side of the transmitter. The color of the LED indicates the battery life of the receiver. The battery charger is designed for a 120volt wall outlet. European 230volt AC chargers and 12volt car chargers for NiMH batteries are also available To use the battery charger Twodog system combine two sets of battery charging splitter cables as shown. Page 12 TESTING illuminates. The LCD screen shows the amount of battery life remaining and the LED indicator blinks once every 4 seconds. FITTING THE COLLAR ON THE DOG FITTING THE COLLAR ON THE DOG 4.

Watch the test light as you push the "Nick" button on the transmitter. It should light up for just a moment. The higher the intensity, the brighter the test light will be. 5. Watch the test light as you push the "Constant" button on the transmitter. It should light up for as long as the button is pressed. Page 13 FITTING THE COLLAR ON THE DOG is on too tight, the dog may have difficulty breathing. ALWAYS check your dog's neck for signs of skin irritation when using an ecollar. If any signs of skin irritation are found, suspend ecollar training and consult with a veterinarian. ATTENTION! Leaving the ecollar in the same position on a dog's neck for extended periods of time can also cause skin

irritation. Depending on the way you hold your transmitter, the range may vary. After each training session, carefully inspect the unit for any missing parts or damage to the casing. Damaged or broken casing may affect the waterproof guarantee on the unit. Storage maintenance Your unit should be fully charged for 10 hours before storing for extended periods. Page 18 TROUBLESHOOTING GUIDE level. The warranty begins from the date of purchase. Page 20 WARRANTY AND REPAIR INFORMATION A copy of the sales receipt showing the purchase date may be required before warranty work is initiated.
