brinly plow manual

When you're ready to break new ground, the Brinly Moldboard Plow is the tool for you. The moldboard turns over old vegetation and sod to make way for new planting. With this tough tractor attachment, there's no walking or fighting with a tiller. Break through sod and hard soil right from the comfort of your tractor seat. Most gardeners agree plowing is fun and satisfying. And it's never been easier with Brinly's PP51 sleeve hitch moldboard plow. Coulter Kit The standard 13 gauge steel coulter kit promotes accurate vertical furrow cuts. ToolFree Adjustment The easy toolfree depth adjustments provides maximum convenience and expedient plowing. Attachment Sleeve hitch Color Black Country of Origin USA Fits Models All garden tractor models Must be equipped with a sleeve hitch Frame Steel Primary Material Steel Product Height in 23 Product Length in 42 Product Width in 12 Warranty 1 Year Disclaimer Requires a sleeve hitch which is not included; sleeve hitches can be purchased through the tractor manufacturer. Where to Buy FAQ Q Will this work with my brand tractor A. The Plow easily hooks up to any lawn and garden tractor equipped with a sleeve hitch. You can purchase a sleeve hitch from your tractor manufacturer. Q Will this work with my ATV. A The Brinly Plow is for use with Garden tractors equipped with a sleeve hitch. Ground engaging attachments require a sleeve hitch to allow the product to be raised and lowered, and to also hold the attachment firmly behind the tractor. Also, ground engaging equipment require a lot of pulling power and traction from the vehicle, so normally ground engaging equipment can only be used with garden tractors. Q Can this be offset to plow a small trench alongside a road. A The plow can be adjusted right slightly but the furrow will still be within the width of the tractor. Q Where can I order replacement parts. It may not display this or other websites correctly. SnuggleCrisp 5.0 out of 5 stars Brinly has been making plows for a long time, so I figured this was going to be a decent unit. The assembly portion of the directions could use some work. You have to follow them very carefully to set the plow up properly. I installed the coulter mount upside down the first time and had to push the pin out and flip it around. Not a huge deal, but you need a punch and hammer to do it. Some of the parts had some minor scratches on them. The Brinly label on the support bar was torn a bit, but other than this everything looked pretty good in terms of road rash from shipping. Fit and finish of the parts were good. The crimped lock nuts can be pretty tough to torque down by hand, so you might want to tighten them up with an air impact wrench if you have arthritis etc. The plow is a lot better quality and beefier than I anticipated. This was a whole new game for me. I never plowed anything before, but needed to before rototilling to make it easier on the equipment.

I also never set up a plow before, but if you follow the instructions you should be good. Made 2 passes, some adjustments in between, and it was set. It plows really well in my sandy loam soil. Very heavy duty piece of equipment, easy to assemble, and a beast to work with. If you are looking to turn over worked ground or break new ground, this Brinly will do the trick. Mostly due to angles and bolt head sizes. That being said this thing is quite sturdy, which is good considering what its used for. It definitely does what it is supposed to and plows nice and deep. I quickly realized a two or three head plow would have been more fitting to what I was doing. but thats not this products fault. I called Brinly and they had the replacement part to me in 2 days. Nice company with fast customer service. Assembly was very easy and straightforward. This plow glides through the soil easily and is very heavy duty and of good quality. I highly recommend it. Its a good thing i have the garden tractor i have Its a 1994 Ingerscoll 4120 big wheel 16 inch rears with 20 H.P motor i dont think a most so called garden tracotr could handle this heavy plow. I orderd it on a Thursday it was hear on Monday at noon WOO!! Easy to build. All parts where there. Hard to set up for plowing. But its OK now an works great. Im not really sure what company i got it from Happy Customer Tom The crank is not threaded appropriately. I had to go buy new jam nuts to thread and the threaded tube does not go on easily enough to allow the the crank to turn. Too bad. I was looking forward to using this. If I want to use it I will need to find a way to get a modified crank. I had to have a machine cut some of the standard to make at fit. A very aggravating piece to assemblr.
