I ordered another MP 160 to replace the old one.

When I finished the set up, I was told that the drivers had been unsuccessfully installed, and that I needed to contact the company. I ignored this and went ahead and tried to print a sheet and was successful. My main complaint is that the printer arrived without a power chord. I was lucky in that the power and USB chords from the old printer fitted. Actually was a purchase to replace inkind printer which experienced mechanical damage. Only negative aspect of the original MP160 was, in my opinion, the ink cartridge replacement costs. I find Canon cartridge replacements, very expensive. Not much experience, with printer ink, but found sources to buy remanufactured cartridges and

ultimately, a refill mail center, which reduced the ink costs in half. The original MP160 was destroyed by a pen falling into the paper feed, and unaware of this incident, I attempted to operate the unit and caused mechanical damage. I ordered an exact replacement and am quite satisfied with my purchase. My printing requirements are small and am not certain what the reliability and efficiency of this particular printer would be under heavy service; but as an average consumer, I could recommend this unit to all. Dana Bourgeois Canon PIXMA MP160 AllInOne Photo Printer Gray Please try again later. Sam 3.0 out of 5 stars These comments are not necessarily specific to the MP160 and some are probably relevant to any printer using Canon's new chipped cartridges. I learned a lot from a Canon MP150 v. similar to the 160 service manual obtained from the net. FWIW, I got into the service readout. I'm still on my 1st standard black cartridge low warning light is on after having printed 368 pages since I got the printer the vast majority in black economy mode. I'm on my 2nd standard color cartridge low warning light is on; having replaced the 1st prematurely. The printer periodically cleans itself and uses 0.1 gm of ink when it does.

My service readout says that my printer has cleaned itself 1013 times and if the MP 160 uses the same amount of ink to clean itself, that means that 3% of my ink has gone to cleaning. So if you use a refilled or 3rd party cartridge, you won't know how much ink you have left. Very telling the MP150's product life, per the service manual, is 6000 pages about half in black, half in color or 3 years of use, whichever comes first. This doesn't bode well for my MP160. I did not spend much on the printer. In fact, I'll pay more for a couple sets of ink cartridges than I paid for the printer. It seems to me that by building low-end printers with very limited product life and by making it hard to use generic inks, Canon is encouraging us to fill landfills with their printers. Please try again later. Please try again later. Amazongirl 2.0 out of 5 stars Use it primarily for home and student, mostly printing. Light use for picture printing, but has done a good job. Best feature is easy set up. Receives a low rating because it uses a lot of ink unless you set it to fast and grayscale. Cartridges are expensive. I have two other Canon printers in my house and have passed them onto my children. These other two printers have lasted the same use or worse for much longer. I am throwing this one in the trash today and currently online looking over the ratings at Amazon, Walmart, and Consumer Reports, to find a new one. I hope that this review helps, as I rely on reviews from others all the time. Please try again later. Please try again later. My wife is a Kindergarten teacher and prints a lot of material on the printer at our expense. The 2nd problem will discourage me from buying Canon again. The part that is called an ink absorber wiper clean the ink cartridge heads has become full of ink and the printer smudges or streaks all the papers. The fix for this Take it to a Canon authorized dealer and pay more than the printer was worth new to have it cleaned or replaced. That is ridiculous.

They should have engineered it so that the consumer could have cleaned or replaced that part. I really hate to think about this going to the dump because of a piece of sponge but a lot of time and research has resulted in few answers. Please try again later. Please try again later. nova 3.0 out of 5 stars This task is possible with the Canon EasyWebPrint utility but this EasyWebPrint is available only through a Web Browser. IE Only. It does not work with Mozilla Firefox. I have no idea why this option provided through EasyWebPrint and is not available as a Standard print option. My 2 yr. old AIO 922 had this option. Specifically, to scan and save document as a PDF file. 3. Lacks LCD screen. 4. Software does not show ink levels before printing. 5. Very noisy. It does have an option to turn down the noise level but it did not make any difference in my case. 6. Does not turn on automatically. But if productivity matters to you then stay away from this printer. Please read Cnet review for more information to compare MP160 and MP180. Please try again later. Please try again later. Inels 3.0 out of 5 stars I did it for over a year. You just have to go into the settings and choose black only. Not bad when you look at more current models cartridges, that cost the same or more, and only print about 160 pgs. Not the greatest printer in the world the scanner was pretty bad, but IMO, not the worst either. Please try again later. Please try again later. P.S. 2.0 out of 5 stars WEAKNESSES Tiny ink cartridges run out quickly and are very expensive for small capacity!;

Somewhat lower scanning resolution 600 dpi is ok for documents but for high quality photo scans 2400 dpi is preferred. OVERVIEW Overall, I thought it was a great allinone machine, printing high quality color photos and grayscale documents. It saves space and is packed with features. So far, I printed one page in color. Colors are OK but ink runs out quickly.

Therefore I will be using it mostly for scanning, printing, and copying documents in grayscale mode. You may even copy your documents without connecting it to PC. One of the cons is a bit high noise of its paper loading mechanism. For ink replacement I recommend buying original Canon ink cartridges only. Because generic ink may clog printing nozzles. Canon MP160 appeals only by its 3in1 function, nothing much exciting beyond that. PRICE PER PAGE ANALYSIS If you use it mostly for grayscale printing, then I dont recommend it because it is VERY EXPENSIVE to run. I counted about over 200 pages printed in grayscale mode and now both ink tanks showing low ink indicator and asking for replacement. Which one is a cheaper to run! I think it is evident from comparison of capacity and price. Now lets go into a deeper analysis. Although I dont print in color, this printer uses both ink tanks, PG40 black and CL41 for grayscale printing. Now do the fair calculation. You can print maximum 300 pages in grayscale using both inks though. I have to cry out loud to Canon WHAT A RIP OFF. Although I dont like HP brand, now Im planning on buying HP 1020 monochrome laser printer. Because it is better quality and better value for grayscale printing. It rather was just fair calculation of expenses. Bring on your counterarguments in comments, if you have any. You may change this option any time if you decide to print in color later. However, if you print mostly in grayscale mode Id highly recommend blackinkonly setting. Im not sure if it will help saving ink if you intend to use printer for grayscale prints exclusively, like I do. Because I still think that for cleaning purposes printer will be using color ink as well. And believe me, printer cleans itself more often as it needs too. Im suspicious if it does cleaning almost or close to every time you turn it on. Of course thats the only way to make even a thrifty user who uses printer occasionally to buy ink over and over again.
