Can someone help me Posted by thecartridgedoctors 4 years ago Canon imageCLASS D661 Answers Canon Imageclass D340 Does Not Copy Service Manual Posted by beway 5 years ago Canon imageCLASS D340 Answers Copier Flashing Alarm Light.incorrect Paper Size.tray A 4 Unable To Get Manual Posted by deejworks 6 years ago Canon imageCLASS D340 Answers Canon Service Manual Pixima Mx850 Is there a service manual for the MX850 available. Thank you,What else do I have to do. When you want to print on paper that is not loaded in the paper drawer, load the paper in the manual feed slot. Loading Paper in the Manual Feed Slot Make sure to load the paper in portrait orientation, as shown in the illustrations below. Otherwise, you may damage the paper drawer by dropping it, if it slides out too easily. Paper cannot be loaded in landscape orientation. Loading too much paper can cause paper jams. Place the legal dust cover over the open part of the paper drawer. If you load a different size or type of paper into the machine, make sure to change the settings. If you do not change the settings, the machine cannot print properly.

Flatten any curls on the printed paper and insert it into the paper drawer or manual feed slot Loading Paper in the Manual Feed Slot , with the side to print face up previously printed side face down. Special Processing. Please try again.Please try again.In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Please try your search again later.With all the copying features you need, plus a 15 pageperminute laser printer, the imageCLASS D340 can satisfy any small business or home office user with its quality laser output. A 50sheet Automatic Document Feeder handles big jobs easily, copying up to legalsize documents. Reduce and enlarge, collate or make draft copies from the easy to use control panel. 50sheet Automatic Document Feeder 15 copiesperminute Copy up to legal size Quality Laser Printing 15

ppm Single Cartridge System Fast, Economical and Easy Printing is fast and easy with Canons printer driver for Windows. Load paper easily in the 250sheet paper cassette and your black and white output comes out crisp and fast. Using a single cartridge system, the imageCLASS D340 is economical to operate and easier to use over other machines that have two cartridges requiring replacement at different times. The Right Solution Whether you are a one person office, or have a small staff, the imageCLASS D340 can be your compact desktop solution to replace older singlefunction machines or as an addition to your current equipment. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Jimmy Parsons 4.0 out of 5 stars It set up easily and made fast, great quality copies. I noticed a couple of glitches but thought them minor.

But after a few days I have discovered shortcomings of the unit, hence the 4stars. I was considering 3 but figure thats too low since it does basic things well. It is a multipurpose machine, but not allpurpose. Paper cartridge falls out if not handled exactly correctly, but paper doesnt come out with it, spilling all over the floor reminds me of the card game 52 Pickup. The cartridge actually is only half a cartridge open at the end inside the printer, not anchored well, feels flimsy. No way to reset it except unplug. So it prints only one oddsize sheet at a time. Print one, unplug, print another, unplug. Im used to a button that clears errors and resets. None on this printer. If you dont need a machine than scans to the computer, and if you can handle the quirky paperfeed requirements, its great. At the price, if it were used just as a copier for a small office it would be well worth the price.This is often how the mfgs will move more units, by selling them at superlow prices knowing they will make their profits on you returning for toner. With the rebate I couldnt pass this up, although if I were paying full retail I would have chosen one that also scans to the PC. This one DOES NOT. It is only a printer and copier. I would also consider one that has a Print server and NIC builtin IF I could also connect directly for scanning. I would recommend this printer.Quality of print is wonderful and it is not noisy. It is BIG. So if you want something small, that is not for you. It ran out after 1100 copies. There is a counter on the printer, so really there is no chance of misperception about the exact copies made. The description says that it was a full toner and not a trial one, so it should have lasted approximately 2200 pages. Fortunately, I had ordered a spare one and that is working fine.However, if you need to copy a legalsize original that cannot be put through the sheet feeder, this copier wont do it.

The physical space required for the sheet feeder took away length from the platen. I returned the D340 for a D320, which is identical in every way, except that it has a platen big enough for a legal sized paper and no automatic sheet feeder. Although I have had the machine for a short time, it seems to deserve the praise that other reviewers have mentioned. Thanks to Amazon for their excellent return policy. It was everything I could have hoped it would be.We have always chosen Canon because weve had such good experiences with Canon. This is the best printer. We shopped on Amazon and found the best price. Yesterday our computer support person hooked up this copier to our two work computers and we no longer need the printer we were using with expensive ink cartridges. Note we only print in black ink at work. It has many wonderful features. Cant say enough about it. OEM Products come with a manufacturer warranty only. The amount of pages can vary depending upon the amount of ink printed onto each page. 5% page coverage is a standard Canon specification We stand behind our products 100%, as these are not manufactured by Canon. Regular ink dries quickly, which is why cartridges for inkjet printers do not last long. Laser Printers use toner, which is ink in the form of powder.In order to get your machine up and running again you will need to replace the fuser. Next put the paper in the tray with the print side facing up. If you are using paper with a logo on it, place the paper with the print side up and load it so that the top of the paper feeds first. Next adjust the slide guides accordingly. Finally set the paper size. In order to set

the paper size you need to press ADDITIONAL FUNCTIONS and select PAPER SETTINGS and PAPER SIZE. Next insert an envelope with the print side up and load it. Now move the slide guides so they are aligned correctly for the size of envelope that you are using.

You need to adjust the slide guides so there is no space between the guides and the edge of the envelope. The final step is to specify the envelope size and type by selecting ADDITIONAL FUNCTIONS and selecting PAPER SETTINGS, PAPER SIZE, and ENVELOPE. You must replace the installed toner cartridge, because it has been completely exhausted or damaged. You must replace the installed toner cartridge, because the described print quality issues are usually caused by a too low toner level the installed toner cartridge is nearly empty. You should always keep a spare toner cartridge for your Canon Copier ImageClass D340 in stock, but please remember to store all consumable copiers components in accordance with the manufacturer's instructions and recommendations. After that, you must take the new toner cartridge out of the protective transport packaging, and then loosen and evenly distribute the toner by shaking the new cartridge at least 78 times vertically. Now, you must grab and detach the sealing tape tab, which is located on the right side of the new toner cartridge, and then remove the sealing tape from the new toner cartridge by pulling its tab slowly out. In the next step of the replacement procedure, you must insert the new toner cartridge into the copier until the right cover moves slightly upwards, but make sure to correctly align the projections of the new toner cartridge with the guides of the copier, and then close the right cover. Please note that the cartridge will be automatically set in place with the closing of the right cover. Please also note that you will have to open and close the right cover of the copier, if the following error message INSTALL CARTRIDGE is still appearing on the control LCD. The 50sheet ADR makes copying multiple pages effortless.

Pros Sitting the Canon on a separate table or credenza will give more than enough clearance to use its automatic document feeder The Automatic Document Feeder ADF allows for onesided scanning of up to 50 lettersize originals or 30 legalsize ones. In less than 11 seconds the D340 starts printing at speeds up to 15 lettersized pages per minute. At the maximum resolution of 1200 x 600, the Canon produces relatively sharp monochrome prints. The D340 relies on the print emulation drivers built into your computer's operating system. The copy function has three different exposure modes to handle text to photo reproduction. The magnification can be automatically or manually changed from 50% to 200% in 1% increments or in 6 presets. Nonstandard materials up to 20pound bond can be loaded into the 10sheet multipurpose tray. The tray doubles as a dust cover for the main tray, but you want to be careful if any paper is placed in the multipurpose tray. The multifunction automatically pulls from the multipurpose tray first. Cons Adding a scanning function does not increase the size of a multifunction and would only improves on its usefulness in an office as more people are going paperless. For budget laser printers, 15 ppm was acceptable in 2003. Today, even inkjet printers are faster than the dated D340. Cantilevered into the side of the D340's body, the tray and the multipurpose tray are separate items where the multifunction piggybacks on the main tray. The problem comes when loading paper in the main tray. What many users don't know is according to Canon's manual, the multipurpose tray is not supposed to be in place during printing from the main tray. Also when adding paper, the user must remove the multipurpose tray first an interesting feat in itself before removing the main paper tray.

Lastly, while the D340 can handle printing envelopes, even its multipurpose tray is not designed for paper beyond the typical 20pound bond, limiting it's usefulness for printing on special papers. Most problems encountered with the D340 involve the paper trays. Instead, the D340 relies on emulation from the host computer itself. For most printing, users won't notice any difference in performance and considering the simplicity of this 2in1 it's unlikely any highend Adobe graphics will be sent to this multifunction anyway.
