I do not leave the printer on a whole lot. May be thats why I did not have that problem some people complained about. The printer makes good color copies. It does a good job of scanning also. I like the software that came with it. Its pretty easy to use. The printer is sort of big, it takes up alot of space. I have not printed a whole lot of copies so I cant comment on how much ink it uses. Not sure what ink cartridges cost either. For what you pay for it its a good value. Its so convenant to make a copy of something at home without having to drive up to a photo copy place to copy something. Its worth it to have one at home. So far good for me.Got this at Amazon for a very good price and in the short time I have had it, I am very happy with its performance. I have used the fax and scanner features quite a few times and find it user friendly. I have had occasion to call Customer Service and found them to be very friendly and helpful.so I highly recommend this product.I has lasted me for years which is more that any other printer that I have owned. The ink is a bit pricey, but all ink is pricey. The ink is easy to find. I buy mine at Sams Club.

The only drawback that I can see is that it has a fairly large footprint. It takes up a lot of space on your desk. Otherwise it is a perfect printer for the home office.It prints beautifully, and is not nearly as loud as my last printer. It makes great copies, and scans nicely. I have not yet used the fax, but I am sure it will work well also, as the other aspects of the machine are great. I have had it running for two months and have not had to replace the ink cartridges yet. I have ordered the injectable ink refills, which were not nearly as expensive as the cartridges, so time will tell as to how long the ink lasts. I would highly recommend this to anyone who is looking for an inexpensive small office multifunction product.And without a doubt, this is easily the least intuitive one Ive ever encountered. I purchased it mostly for the faxing and scanning capabilities I already had a basic printer but those parts of the operation are unnecessarily confusing. Ive spent a few hours figuring out the most basic functions. If you dont have much spare time, this may not be the printer for you.Great product.I suspect it is the ink that. I suspect it is the ink that came with it, perhaps it is very old.Unlike some other reviewers, I found the setup to be simple less than 15 minutes, most of which was software download. It prints much more quickly that the older Lexmark all in one I was using but you can get around this by choosing the fast print option. The only down side I have found is that I am replacing ink every 15 days or so but then again it is printing at least 30 pages per day. Given the price, it is a true value for the money. I will probably buy another one when I need a new printer for home.Page 1 of 1 Start over Page 1 of 1 In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading.
