This chapter assumes that the camera is set to A mode. What if a flashing When you press the shutter button halfway in low light conditions where camera shake is likely, a flashing tripod to prevent it from moving. Zooming In More Closely on Subjects Digital Zoom You can use the digital zoom to zoom up to approximately 20x maximum, and. Once inserted, however, they cannot be deleted. Be sure to check beforehand that the date and time are correctly set p. 19. You can insert and print the shooting date in images which do not have an embedded date and time as follows. The camera will shoot approximately 10 seconds after the shutter button is pressed. If the flash fires or you set a high number of shots, the shooting interval may take longer than usual. Shooting will stop automatically if the memory card fills. The digital zoom p. 50 can only be used in an aspect ratio of Changing the Compression Ratio Image Quality You can choose from the following 2 compression ratios image quality Fine, Normal. If the aspect ratio is changed p. You can automatically correct the green tint when shooting Multiarea White Balance. Enter K mode. Set the mode dial to K. Choose a Shooting mode.

After pressing the m button, press the op buttons to choose Press the qr buttons or turn the 7 dial to choose a Shooting mode, then press the. Move approximately 1 m 3.3 ft. or more away from your

subject and shoot. Take nightscapes without using a tripod Handheld NightScene Lets you take beautiful snapshots of city. Since you may not achieve the expected results with images shot in Enter mode. Set the mode dial to Choose a Shooting mode. After pressing the m button, press the op buttons to choose Press the qr buttons or turn the 7 dial to choose a Shooting mode, then press the. This lets you reduce highlight blowout and loss of details in shadowed areas commonly found in high contrast scenes. Lets you shoot black and white images. Super Vivid Lets you take shots with vivid, intense colors. Poster Effect Lets you take shots that look like an old poster or illustration. Shooting with Faded Colors Nostalgic This effect fades the colors and roughens the image so that it looks like an old photograph. Taking Shots That Look Like a Miniature Model Miniature Effect Blurs chosen portions in the top and bottom of an image to produce the effect of a miniature model. Press the op buttons to return the frame orientation to horizontal. Lets you shoot black and white images. Sepia Lets you shoot sepia toned images. Blue Lets you shoot blue and white images. Shooting with Color Accent You can choose to retain a single color and change the rest to black and white in a composition. Shooting with Color Swap You can swap one color in an image for another when recording it. You can only swap one color. Specify the color to be swapped. Position the center frame so it is filled with the color you want and press the q button. Each time you take a picture, the scene just before taking your shot will be recorded as a movie. All the movies recorded that day will be saved as a single file. What if a smile is not detected.

Smiles are easier to detect if the subject faces the camera, and opens their mouth enough to show some teeth when smiling. The camera will shoot approximately 2 seconds after it detects a wink. After choosing Even if your face is not detected after joining the subjects, the shutter will release approximately 15 seconds later. Detecting a Face and Shooting Smart Shutter Join the subjects and look at the camera. AE stands for Auto Exposure. Auto Day Light Cloudy Tungsten Fluorescent Fluorescent H Flash Underwater Custom Choose the white balance function. After pressing the m button, press the op buttons to choose Choose an option. Make sure that you set the white balance under the light source of the actual scene you will shoot. If you change camera settings after recording white balance data, the tone may not turn out properly. To suppress highlight blowout, Dynamic Range Correction is used. To bring out shadow details, Shadow Correct is used. You can use the supplied software to adjust the image in any way you like with minimal loss in image quality. My Colors Off Vivid Neutral Sepia Positive Film Lighter Skin Tone Darker Skin Tone Vivid Blue Vivid Green Vivid Red. Shooting Closeups Macro If you set the camera to e, it focuses on close subjects only. This is effective for focusing on a specific point. Choose After pressing the m button, press the op buttons to choose Press the qr buttons or turn the 7 dial to, then press the m button. The focus adjustment can be set in 3 levels. Register 0 to the p. 187. Enter Face Select mode. If you press the shutter button halfway after roughly focusing manually, you can fine tune the focus. For standard shooting conditions, including back lit shots. Evaluative Automatically adjusts the exposure to match the shooting conditions. Center Averages the light metered from the entire frame, but gives greater Weighted Avg. AE stands for "Auto Exposure".

Program Shift If you lock the exposure and turn the 7 dial, you can change the shutter speed and aperture value combination. Attach the camera to a tripod to prevent camera shake. The location information data can also be recorded separately from images and movies. This function can also be used to automatically update the camera's clock. When keeping it in your bag, try to keep it in an outer pocket with the GPS signal receiver pointed toward the sky. The camera's positioning data or the Displayed shooting date can be recorded. Flashing Searching for GPS satellite. Displayed Cannot receive GPS satellite signal. Based on the received signals, the location information and shooting date for a single day will be recorded in a GPS log file, separate from images. If this icon appears, exercise caution when formatting the memory card pp. The camera will set the appropriate aperture value for the shutter speed you set. M stands for "Time value". The camera will set the appropriate shutter speed for the aperture value you set. B stands for "Aperture value", which refers to the size

of the aperture opening inside the lens. D stands for "Manual". By performing operations with the control ring, you can enjoy the feeling of using a fully manual camera. Choose a function to assign to the y ring. The functions assigned to the control dial also change. Adjusting the Flash Output In D mode, you can choose 3 levels of flash output. Adjusting the Flash Output Choose Follow Step 1 on p. Press the r button, then the n button, and the settings screen will appear. Even in E, the shutter button. You create the miniature model effect by choosing the upper and lower portions of the scene that will be blurred, and the playback speed, which makes people and objects in the scene move quickly during playback. However, unnatural sound may result when used to record in locations with no wind. Other Shooting Functions The following functions can be used in the same way as for still images.

However, depending on the Shooting mode, settings may not be available or may not have any effect. The movie editing panel and the movie editing bar will appear. Searching Images by Scrolling Turning the 7 dial will display images in a line letting you quickly search them. You can also protect p. 148 or erase p. 152 images at once while filtered. Filters that do not have any corresponding images cannot be chosen. Filtered playback In filtered playback Step 2, you can view filtered images with "Quickly Searching Images" p. 138, "Viewing Slideshows" p. 142, and "Magnifying Images" p. If you keep the qr buttons pressed, you can fastforward through images. Changing Image Transitions You can choose from 3 transition effects when switching between images in single image playback. Move the zoom lever toward k. Choose a setting. The focus check display is not available for movies. Press the p button to switch to the focus check display p. 40. A white frame will appear where the AF frame was when the focus was set. If you choose one of those images, the camera will select 4 more images letting you enjoy playing back images in an unexpected order. This will work best if you take many shots of various scenes. Protected images cannot be erased with the camera's erase function. To erase an image, cancel protection settings first. Selecting a Range Choose images. Press the qr buttons or turn the 7 dial to choose an image, then press the m button. Press the qr buttons or turn the 7 dial to choose an image, then press the m button. Since erased images cannot be recovered, exercise adequate caution before erasing. Protected images p. 148 cannot be erased. If you press the n button, a confirmation screen will appear. You can also filter out just those images for viewing, protecting or erasing p. 140. If you switch to Shooting mode or turn off the camera before completing the setting in Step 3, images will not be tagged as favorites. Selecting a Range Choose an image.

Press the qr buttons or turn the 7 dial to choose an image. Also, when the overall image is lacking in contrast, the camera will automatically correct the image for a sharper impression. The displayed screens and available functions will differ depending on the printer. Please also refer to the Printer User Guide. Connect the camera to the printer. Open the cover and insert the cable's small plug firmly into the camera terminal in the direction shown. Choose an image. Press the qr buttons or turn the 7 dial to choose an image, then press the m button. Both Default RedEye1 No. Trimming — Paper Settings — Connect the camera to the printer. Choose a paper size. Press the op buttons or turn the 7 dial to choose an option, then press the m button. Bordered Prints with a border. Borderless Prints without a border. Nup Selects how many copies of an image are printed on a sheet. Prints ID photos. ID Photo Only images with a recording pixel setting of L and an aspect ratio of 43 can be chosen. Connect the camera to the printer. These selection methods comply with the DPOF Digital Print Order Format standards. If you change the settings using this camera, all the previous settings may be overwritten. Press the op buttons or turn the 7 dial to set the number of prints maximum 99. Repeat Steps 2 and 3 to choose other images and the number of prints for each. All selections will be cleared. The first part of this chapter explains convenient and commonly used functions. The latter part explains how to change shooting and playback settings to suit your purposes. As you cannot retrieve the erased data, exercise adequate caution before formatting the memory card. Press the qr buttons or turn the 7 dial to choose an option. Register the startup image

or sounds with the included software The dedicated operation sounds and startup images on the included software can be registered to the camera. Refer to the Software Guide for details.

Changing the Lens Retract Time For safety reasons, the lens retracts about 1 minute after pressing the 1 button when in a Shooting mode p. Using the World Clock When traveling abroad, you can record images with local dates and times simply by switching the time zone setting. You can turn off this function. Changing the Image Display Time Right After Shooting You can change the length of time the images display right after shooting. Customizing Display Information You can change which information is displayed by switching between custom displays with each press of the p button. If you press the shutter button halfway and return to the shooting screen from the custom display settings screen, the settings will not be saved. Changing the ISMode Settings If camera shake is too strong, attach the camera to a tripod. White Yellow Yellow White What if the images don't display correctly on the TV. Using a TV Remote to Control the Camera When you connect the camera to an HDMI CEC compatible TV, you can use the TV's remote control to operate the camera and play back images or view slideshows. Terminals Do not unplug the plug or power cord with the camera turned on. This could erase images you have taken or damage the camera. Disabling Eye-Fi Transfer You can set the card to disable Eye-Fi transfer. If the items below do not solve your problem, contact a Canon Customer Support Help Desk. Power You pressed the power button, but nothing happened. Refer to "Functions Available in Each Shooting Mode".
