Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with carvin rx800 manual . To get started finding carvin rx800 manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

carvin rx800 manual

Carvin will service INSERT A DAMAGED OR CUT MAIN PLUG INTO A POWER SOCKET. Here are some brief instructions to get you going quickly. Continuous full power is assured from a 370 sq This will provide the best pos. These documentations are only intended for qualified technicians who are aware of the respective safety regulations. Products names, logos, brands and other trademarks are the property of their respective trademark holders in the USA and other countries. Lastmanuals provides you a fast and easy access to the user manual CARVIN RX800. We hope that this CARVIN RX800 user guide will be useful to you. In addition, limiters can increase your amps average output by 3 db or more. The panel of your unit can be wiped from time to time with a dry or slightly damp cloth in order to remove dust and bring back the new look. As with all pro gear, avoid prolonged use in caustic environments salt air. When used in such an environment, be sure the mixer is adequately protected by a cover. CHANNEL 12 or 8 BYPASSES BREAK SWITCH SEVEN BAND GRAPHIC EQUALIZER LEFT AMP1 LEFT XLR OUT TO AMP 1 INSERT RIGHT XLR OUTGAIN HI MID LOW CHANNEL LEVEL EFF SND x2 LINE INS SWITCH L MON 1 TAPE OUT BREAK SWITCH R MAIN LR LEVELMAIN DSP LEVEL x2 MONITOR 2 LEVELDSP SEND x2 EXTERNAL SEND x2 Approved By. If you want to make sure that the CARVIN RX800 is the solution to your problems, make the most of the help and assistance of other Diplofix users. Its users dont find it efficient., Moreover, most of them share the same opinion They find it expensive for what it offers Youll find the answers to all your questions on the CARVIN RX800 in the user manual information, specifications, safety advice, size, accessories, etc. Reduce these levels if PEAK LEDs are flashing on the effects processors. The remaining input channels 17, or 111 are turned OFF eliminating feedback or other unwanted sounds from open mics during breaks or changes. The LED indicates the MUSIC BREAK is ON. The internal effects are also muted. The MON 1 and MON 2 level controls adjust the volume of the channel going to the monitor amps. The monitor level control is a prechannel level control. This means it is unaffected by adjustments from the channel level. The purpose for this is the monitor mix adjustments can be made without disturbing the main mix. These function as boost clockwise or cut counterclockwise controls. The reviews rough results are presented in the following graph 0 1 2 3 4 5 6 7 8 9 10 By leaving the mouse on a column for a few seconds, you can see the number of people who voted to make up the score that appears in the horizontal axis. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Page Count 4 Please read this manual carefully to take advantage of the many features of your mixer. A state of the art, low noise, high headroom, balanced XLR preamp for each channel features a common mode rejection of better than 78 dB, which means that any possible noise that may come over your cables is virtually eliminated. Even the balanced XLR output connectors guard your system from cable noise for professional recordings or external power amp connections. Distortion is nearly nonexistent with THD below .1%, which guarantees the purity of your sound. It will be dynamically open and transparent just like it was meant to be. LIGHT WEIGHT and EASY TO USE controls are logically laid out, making the RX Series simple to use quick adjustments can be made easily. Its compact size and weight of 30 lbs. No other competitor in the industry offers a higher performance to weight ratio! 4 HIGH CURRENT AMPLIFIERS deliver 300 watts RMS each. A total of 600 watts is delivered to your main speakers, plus two 300 watt amps to drive your stage monitors for a total of 1200 watts. The RX1200R features a 125k Hz switching power supply for operating your mixer at any volt age from 90 V AC to 240VAC. Like a laptop computer, you can go anywhere in the world and not worry about power adapters. 2 INDEPENDENT 24Bit STEREO DSP EFFECTS allow you to independently assign each channel to your choice of simultaneous effects. Both effects are assignable to your stage monitors so you can hear yourself with full effects.

The effects processors feature 256 effects each, including reverbs, choruses, flanging and echoes, with parameters fully adjustable for; damping, decay, depth, speed, regeneration and time. ACTIVE 3 BAND CHANNEL EQ provides easy adjustment for the tone you want. The LO frequency controls start at 20 Hz and continue through 80 Hz for a solid nonflabby bass. A simple adjustment with the MID control gives you the best sound for vocals or guitar in the very important 750Hz frequency range. The 11.5k Hz HI treble control adds sparkle to your top end without adding harshness. FOUR 7 BAND EQUALIZERS provide precise adjustments to fine tune your overall sound and to help control feedback. In addition, limiters can increase your amp's average output by 3 db or more. Part of Carvin's design uses the more expensive, distortion free linear "opto isolators". Unlike amps that use FET controlled limiters which can inject small amounts of distortion, our limiters keep your sound pure and uncolored. ENGINEERED TO LAST Every RX Series mixer is housed in a rugged reinforced steel rackmountable chassis. Continuous full power is assured from a 370 sq inch, high grade 6063T5 aluminum heat sink cooled by a quiet variable speed fan. You'll never have to worry about protect or power reduction modes. Hidden deep in the heart of these mixers is the "SMT" Surface Mount Technology construction that utilizes surface mounted components to prevent parts from shaking or vibrating loose. Sealed controls and switches guard against the outside elements while heavy duty connectors provide a positive connection to your cables. Fire retardant FR4 military spec circuit boards feature double sided copper construction to guard against noise and radio frequencies RF. Precision 1% tolerances guarantee that your settings will be accurate every time. The RX Series is professionally made in the USA for years of service.

RECEIVING INSPECTION—read before getting started INSPECT YOUR AMP FOR ANY DAMAGE which may have occurred during shipping. If any damage is found, please notify the shipping company and CARVIN immediately. In the event you have to reship your unit, always use the original carton and packing material. This will provide the best possible protection during shipment.

CARVIN and the shipping company are not liable for any damage caused by improper packing. SAVE YOUR INVOICE. It will be required for warranty service if needed in the future. SHIPMENT SHORT AGE. If you find items missing, they may have been shipped separately. Please allow several days for the rest of your order to arrive before inquiring. RECORD THE SERIAL NUMBER on the enclosed warranty card or below on this manual for your records. Keep your portion of the card and return the portion with your name and comments to us. LEVEL x2 STEREO DSP. Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings. POWER SOURCES The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance. GROUNDING OR POLARIZATION Precautions should be taken so that the grounding or polarization means of an appliance is not defeated. POWER CORD PROTECTION Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance. SERVICING The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel. FUSING If your unit is equipped with a fuse receptacle, replace only with the same type fuse. Refer to replacement text on the unit for correct fuse type.

This symbol is intended to alert the user to the presence of important operating and maintenance servicing instructions in the literature accompanying the appliance. LIMITED WARRANTY Your Carvin product is guaranteed against failure for 1 YEAR unless otherwise stated. Carvin will service and supply all parts at no charge to the customer providing the unit is under warranty. Shipping costs are the responsibility of the customer. This warranty does not cover, and no liability is assumed, for damage due to natural disasters, accidents, abuse, loss of parts, lack of reasonable care, incorrect use, or failure to follow instructions. This warranty is in lieu of all other warranties, expressed or implied. No representative or person is authorized to represent or assume for Carvin any liability in connection with the sale or servicing of Carvin products. Describe in writing each problem. If your unit is out of warranty, you will be charged the current FLAT RATE for parts and labor to bring your unit up to factory specifications. MAINTAINING YOUR EQUIPMENT Avoid spilling liquids or allowing any other foreign matter inside the unit. The panel of your unit can be wiped from time to time with a dry or slightly damp cloth in order to remove dust and bring back the new look. When used in such an environment, be sure the mixer is adequately protected by a cover. Here are some brief instructions to get you going quickly. Your mixer is now ready to operate by turning the levels up. Examples of these inputs would be guitar, keyboard or CD player. The line input can be used at the same time the mic input is being used. The "OUT" position is for normal LINE level inputs. Pressing the INSERT switch "IN" changes the jack into an INSERT with SEND and RETURN. Connections are TIPSEND and RINGRETURN. 3. XLR MICROPHONE INPUT The XLR MIC input is designed for balanced low impedance microphone and DIRECT OUT signals.

Note Make sure the phantom power is switched off discharged for at least 5 seconds before connecting or disconnecting microphones to the mixer. 4. CHANNEL LEVEL CONTROL The LEVEL control adjusts the volume of the channel before going to the PAN control. With a LOUD input signal, loud vocal, hard hits on drums, etc. turn up the GAIN control until a strong signal is present. If the "PK" LED shows or distortion is heard, the input stage is being overdriven. The monitor level control is a prechannel level control. This means it is unaffected by adjustments from the channel level. The purpose for this is the monitor mix adjustments can be made without disturbing the main mix. 9. CHANNEL TONE CONTROLS Each channel features active 3band tone controls LO, MID, and HI. These function as boost clockwise or cut counter clockwise controls. The center 0 is the "flat" or no effect position. The LO and HI controls are shelving type with corner frequencies at 80Hz and 11.5k Hz respectively. The MID control is a band pass type centered at 750Hz. This allows prerecorded music to be played through the TAPE IN jacks. The channel 8 or 12 MIC and LINE

inputs are left active for announcements or solo performers. The remaining input channels 17, or 111 are turned OFF eliminating feedback or other unwanted sounds from open mics during breaks or changes. Use this output for additional power amps or amplified subwoofer. 17. SUB XOVER SWITCH The SUB XOVER crossover switch removes all frequencies above 120Hz for connecting the MONOSUB output to an amplified subwoofer. These TAPE IN jacks can also be used for returning another stereo effects processor or instrument keyboard. If the TAPE OUT is being used to record, make sure the TAPE IN control is turned OFF to avoid feedback. The MONITOR 12 levels control the amount of effects that go to the MONITOR outputs.

EFFECT PARAMETERS Each of the four effects have variable parameters that are easily adjusted by the SELECT and the PARAMETER controls to get the desired effect. Note An audible noise will be heard while adjusting the effects. A ECHO Use SELECT to change the amount of regeneration number of repeats. The PARAMETER control adjusts the delay time between the original signal and the echo. B REVERB SELECT the amount of presence high frequencies in the reverb. The PARAMETER control adjusts decay. C CHORUS SELECT the amount of reverb with your chorus. The PARAMETER control adjusts the depth. D FLANGE SELECT the amount of speed with your flange phasing effect. These are the same signals sent to the internal EFFECT 1 and EFFECT 2 processors. 21. AMP CLIP LED's The amp CLIP LEDs indicate when the internal power amps are starting to distort clip. If you encounter an over heat problem, leave the mixer ON allowing the fan to cool down the internal components. The mixer will autoreset. 23. POWER LED The Power LED indicates when the mixer is powered on. 24. ADJUSTING THE GRAPHIC EQUALIZER When the EQ sliders are in their center position, they do not affect the audio signal. When EQ sliders are raised or lowered from this position, they boost or cut respectively a narrow frequency band. To reduce feedback in the low frequency range, try lowering one of the 80 or 160 Hz sliders. High frequency feedback is usually reduced by lowering one of the 2k or 6k Hz sliders. To help prevent feedback, the main speakers should be placed in front and away from the microphones. For tone enhancement you may want to raise the 80, 160 for deeper bass and the 6k, 12k sliders for crisper highs forming a "smile" curve as shown. 25. EFFECTS FOOT SWITCH JACK The optional FS22 will remotely shut off EFFECTS 1 or 2. 26. PHANTOM POWER SWITCH AND LED The PHANTOM power switch turns on the microphone phantom power in the channel XLR jacks.

This power is used for supplying a voltage to condenser microphones. The LED indicates the phantom power is turned on. The phantom power will not damage conventional dynamic microphones. Note Make sure the phantom power is switched off before connecting or disconnecting microphones to the mixer. It is recommended to allow 5 seconds for the phantom power to discharge before making any microphone connections. REAR PANEL FEATURES RX1200, RX800 27. POWER CONNECTIONS The rear panel contains the POWER SWITCH and AC power cable connection. 28. AMP PATCH INSERTS The AMP PATCH INSERT jacks offer full flexibility for mixer to amp signal routing. These jacks are TRS TipRingSleeve. Tip is the power amp input. Ring is the signal sent from the mixer. The built in power amp limiters are post insert. Patching a compressor or equalizer between the mixer and the amp can be done by using a stereo insert cable like Carvin's AP1. Connect the RING signal to the INPUT of the external device, and the TIP signal from the OUTPUT of the device. SPEAKER CONNECTIONS For the RX800 and RX1200, there are 4 groups of speaker jacks. AMP 1 is for LEFT speakers. AMP 2 is for RIGHT speakers. AMP 3 is for MONITOR 1 speakers. AMP 4 is for MONITOR 2 speakers. NOTE 4 MIN IMPEDANCE PER AMPLIFIER Maximum one 4.
